Governance

Governance

naar binnen gekeerde cultuur. In het provinciehuis zijn ambtenaren en politici elkaar al geruime tijd aan het feliciteren met de formidabele manier waarop zij werken. Woensdagochtend hielden ze er maar weer eens een bijeenkomst over. Of dat tot betere plannen leidt, maakt niet uit. Het provinciehuis is in handen gevallen van procesmanagers en consultants.

Het is dezelfde cultuur waarin het streven naar meer groene energie vooral betekent dat eindeloos veel discussiebijeenkomsten en congressen worden georganiseerd. Tot de productie van meer groene energie leidt dat nauwelijks. Niettemin heerst er grote tevredenheid.

'GRC' in 2015 (I)

- “...we hebben hier geen regels; we proberen wat te bereiken!”
- ‘Disruption’
Kaizen .. verbeterstapjes .. upgrade .. innovatie .. Disruptie

The image shows a comparison between old and new cell phones. At the top, there are icons of a flip phone and a smartphone. Below them is a table with the following data:

	BEFORE	NOW
Battery life	3-4 days	3-4 hours
Impact limit	third floor (asphalt)	2 feet (hardwood floors)
Impact protection	Built-in	Needs add-ons
Software updates	Unnecessary	Approx. once a week
Life span	Still going	Max. 1-2 years
Typing speed	9 characters per second	Damn you autocorrect!

truthfacts.com

'GRC' in 2015 (II)

- Kippenhok / When the going gets tough, the Info(Sec) masters get going:
- ISO27001:2013, ISO15504(SPICE)
- OSSTMM (hopelijk)
- Risicoanalyse:
 - Doorbraak van Normaal Doen (hopelijk)
 - Be Prepared + Acceptatie

Business

Business

- Big IT
- IoT
- B2C 'Innovatie'
- (Hobbeltje InfoSec → ITSec)

Business (Big IT 2015)

- Big Data segmentation
- Docker, Firebase
- e.v.a.
- SMACI(o)T
- (Google Docs, Klaut)

Business (IoT 2015)

- Convergence van APIs
- Stealth

Nog wat B(2B, 2C)

- Bitcoin / Blockchain (onder water)
163 cryptocurrencies
- Webrooming → Showrooming
- Alibaba, Tencent, Baidu > Amazon+Ebay
- Mobile payments, NFC
- 3rd Platform / Fabric

- Drones
- Sharing Economy
- Virtual Reality ..?

The FTC has raised concerns about the complexity and privacy risks posed by the rise of an Internet of Things, with some 25 billion connected objects predicted to be online in 2015, and so-called smart home devices predicted to number around 25 million this year.

Auditprogramma's (Yours Truly)

Yours Truly (?)

	Things and networks	Ingestion and delivery	Aggregation and integration
Tech, protocols, and standards	Which short-range radio tech — ZigBee, Z-Wave, or others?	Use HTTP or IoT-specific standards such as MQTT or CoAP?	DIY API management or SaaS service?
Distributed data, analytics, and logic	Which programming language for proprietary edge devices?	How to extract and coordinate logic running in IoT platform?	How to document dependencies on third-party data?
New security challenges	How to ensure immutable device state?	How to prevent data monitoring by hackers?	How to guard against API hacking or denial of service?
New network demands	How to enable IoT on-site while guarding core network?	How to enable mix of high volume streaming and low latency?	How to monitor and protect with many partners and services?
Time series demand	Filter at edge, or transmit raw data in volume	Capture as time series or as event?	How to store so it's easy to transform as needed?

To watch

Reeds

"This important book deserves to be read, and digested, by all who wrestle with, and enjoy—or worry about—a world transformed by digital technology."

—KEN AULETTA, author of *GOOGLED*

The Formula

“The RMV itself was unsympathetic, claiming that it was the *accused individual’s ‘burden’ to clear his or her name in the event of any mistakes*, and arguing that the pros of protecting the public far outweighed the inconvenience to the wrongly targeted few.”

Venture Capital Firm Appoints Machine Intelligence As Board Member

George Dvorsky

Filed to: FUTURISM 5/15/14 7:30am

26,884 🔥 6 ★

1

Hong Kong based venture capital firm Deep Knowledge Ventures (DKV) has appointed a machine learning program to its board. Called VITAL, it's an "equal member" that will uncover trends "not immediately obvious to humans" in order to make investment recommendations.

This is probably an attempt to attract media attention, but it could truly be the start of a larger trend; it's the world's first software program to be appointed as a board member. The move could also herald a new direction in the way venture capital is done.

The tool was developed by Aging Analytics UK who's licensing it out to DKV, a capital fund that focuses on companies developing therapies for age-related diseases and regenerative medicine.

And so it begins...

ITSec

ITSec

- Poodle, Beast, Heartbleed → Open Source ?
- Encryptie-by-default; Diaspora*, TORbrowser, PGP
- OSSTMM / ISO27k1:2013
- IoT Security / Audit → IAM ? / Analyse ?
- APTs

Droom (wiegeliedje?)

And so it begins...

Enterprises are under siege from
a rising volume of cyberattacks.

At the same time, the global demand for skilled professionals sharply outpaces supply. Unless this gap is closed, organizations will continue to face major risk. Comprehensive educational and networking resources are required to meet the needs of everyone from entry-level practitioners to seasoned professionals.
