

## ISACA NL Chapter januari 2023

Dear members,

Happy New Year and a secure 2023!

The year really started with a blast. A new record amount of about 110 million euro was spent on fireworks in the Netherlands, but unfortunately not without risks. Multiple messages regarding the risks of fireworks have been published in the first hours of this new year.

If I think about the risk and the record of turnover in fireworks it crosses my mind that that amount of money can also be the claim in a ransomware attack. It can also be a huge investment in becoming more cyber resilient. Making that connection, in 2022 a few great steps were made: ISO27001/2:2022 was published as well as the Cyber Resilience Act (CRA) in the European Union, with more to come this year (e.g. the Cyber Resilience Act on Automotive).

Having these new versions of ISO and CRA is of course a beautiful start of a year in which we can enhance the cyber resilience. In our profession on auditing, security, privacy and risk 2023 is a year we can further improve our identification, protection, detection, response and recovery measures using the new enhanced improvements. A great challenge to mature this and realise the shift left in both system development and system management.

Please join ISACA NL chapter in maturing on all aspects like privacy, security, auditing and risk. Let's jointly know where we are today and what we will achieve in 2023. I started today already with this message, hoping you all join in realising our ambitions.

Barry Derksen

*Board member ISACA NL Chapter*

## Thank you!

The board of ISACA NL Chapter wants to send a huge thank you to all our members, volunteers, speakers, staff, sponsors, and partners!

Because ISACA NL Chapter can only grow and flourish through and thanks to the efforts of volunteers, we are organizing a special Volunteer Event in February with speakers from ISACA Global and ISACA Chicago. The event will be organized for active and upcoming/new volunteers.

Would you like to volunteer for our association? Join us via [vrijwilligers@isaca.nl](mailto:vrijwilligers@isaca.nl). Are you already active as a volunteer for ISACA NL? Then keep an eye on your e-mail, volunteers will receive a special invitation for this event.

---

Square Table 11th of January 2023

## Design a Cybersecurity Strategy with the Cybersecurity Canvas

Join this webinar with [Vincent van Dijk MSC](#), founder of Security Scientist. In his scientific journey with the Antwerp Management School Vincent created the Cybersecurity Canvas, a tool to design cybersecurity programs and strategies. In this talk, he will cover the Cybersecurity Canvas, how you can use it, and its origins from our research.

Round Table, 25th of January 2023

## Autonomous pen-testing; strengths and weaknesses

Autonomous pen-testing is an innovation that brings new possibilities. The thoroughness and completeness that it offers, might even be better than conventional human pen-testing. Is it conceivable that these autonomous tests will take over from the human ethical hackers or will human creativity still be needed?

In our next Round Table [Snehal Antani](#), CEO and co-founder of Horizon3.ai, and our speaker from Netboss will elaborate on possibilities, strengths and weaknesses of autonomous pen-testing. We will close the meeting with a panel discussion in which an ethical hacker will join us.

### Program:

18:00 simple dinner

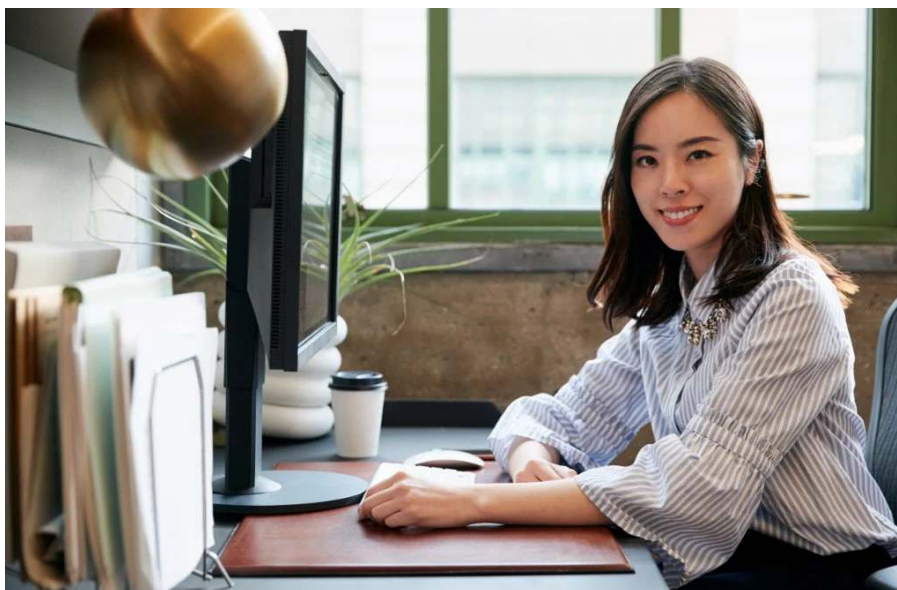

18:30 start presentation

19:30 panel discussion

20:00 end meeting

20:00-21:00 drinks and networking

## Trainingen: schrijf je nu in!

Dit voorjaar organiseert ISACA NL Chapter weer diverse trainingen. Start het nieuwe jaar goed en schrijf je direct in via deze links:

- [CISA](#)
- [CISM](#)
- [CRISC](#)
- [CGEIT](#)
- [COBIT2019](#)
- [ISO27701 Privacy Information Management Systems Lead Auditor](#)
- [ISO27001 Information Security Management Systems Lead Auditor](#)

Let op: de trainingen worden in het Nederlands verzorgd.

[Lees meer over onze trainingen](#)

## Trainers gezocht!

ISACA NL Chapter is op zoek naar trainers, bijvoorbeeld voor de [COBIT](#)- en [CDPSE](#)-training. Ben jij een ervaren docent op dit vlak en beschikbaar in 2023, neem dan contact op met Erik van Eeden via [trainingen@isaca.nl](mailto:trainingen@isaca.nl)

# TLS 1.2 – Client Hello

## An overview of webinars in 2022

In the past year, the Square Table Committee organized more than 40 webinars in collaboration with the knowledge groups. Most of these webinars have been recorded and can be viewed via our YouTube channel. Have a look at our webinars in 2022, for example 'I know all your weak cryptographic keys, scary isn't it?'
