ISACA NL Chapter februari 2023

Dear members,

ISACA NL Chapter can only prosper through the efforts of volunteers who are willing to share their knowledge, either via the knowledge groups or via a variety of Round Tables, Square Tables and congresses.

That is why I'm pleased to share that we are organizing a special ISACA NL Volunteer Event on the 13th of March 2023. During this event speakers from ISACA Global will be flown in from the United States to share their thoughts and insights. In addition, the speakers during the day will provide in depth knowledge on Digital Trust and COBIT. At the end of the day there will be a diner and drinks for all volunteers.

The event is free of charge for the volunteers and members who are willing and interested to contribute to our great association ISACA Netherlands. So everyone who is interested can join.

Therefore please keep an eye on the activity calendar, the location and more information will follow.

Save the date! 😊

Hoping to see you there,

Dwayne Valkenburg,

Chairman ISACA NL Chapter

Short survey (3 minutes)

The last few months as a board we have been taking a closer look at several aspects of our association.

To improve our activities, we would like to hear about your experience with ISACA NL Chapter. Your opinion is very important to us. To gain a better insight into your wishes and needs, we would therefore like to ask you to complete **a short 3 minutes anonymous survey**.

Your opinion and input is greatly appreciated, as we will use it to improve our services for you as a member!

Round and Square Table Agenda

In January we had our first Round Table in 2023. While enjoying a snack and drink, an interesting presentation was given to us by outstanding speakers from Horizon.ai and Netboss on autonomous pen-testing. Also we had the pleasure of an insightful presentation by Vincent van Dijk on the Cybersecurity Canvas he developed during a well-watched [webinar](). In february we have some interesting Square Tables on risk management for you in store. The next one is scheduled for [February 8]().

Square Table, 8th of February 2023

Risk management in an agile setting

Risk management tends to be underemphasized in an agile context. How do you address risks more explicitly in the agile way of working? Find out in our webinar on the 8th of February 'Risk management in an agile setting' with [Egbert Bouman](), thought leader on smart and agile (automated) software testing.

Square Table, 15th of February 2023

Revisiting Technology Risk Quantification

This webinar by [Atul Kumar]() is set up in four sections:

- Section 1 – Technology risk management and its importance in connected entities within a modern organization
- Section 2 – Classical Risk Management (Qualitative) V/S Quantitative Risk Management techniques
- Section 3 – Benefits of accurate decisions based on a quantified analysis
- Section 4 – Implementation prerequisites and areas to ponder

At the end of his presentation there will be ample opportunity to share insights and ask questions.
