## Keynote speakers Risk Event 2023

[Offensive AI: Combatting the AI Attack Surface](#)

### Opening keynote: Srinivas Mukkamala

[Srinivas](#): 'AI may know a lot about something, but it doesn't know everything. It is only as good as the data and time spent improving it. AI hacking is a real threat, and the AI attack surface continues to expand as the use of AI continues to explode. A few most common AI attacks are Privilege Escalation, Prompt Injection, and Training Attacks. In this talk I will discuss how to turn the tables on threat actors and anticipate AI attacks.'

[Behavioural insights](#)

### Closing keynote: Dominique Schreinemachers

[Dominique](#) is one of the few female military pilots in the Air Force. She was trained by former Vietnam veterans in the United States and has managed to hold her own as a woman in a man's world during the most challenging training and missions, including the mission to Afghanistan where she was shot down with her helicopter by the Taliban in 2009. Nowadays Dominique inspires people through her stories that touch everyone and make them think. Important themes in Dominique's daily practice are: collaboration, leadership,

## Getting buy-in from the Boards of Directors

In our rapidly evolving digital landscape, information security has transcended its traditional role as a departmental concern to an organizational responsibility. With the arrival of NIS2 and other emerging laws and regulations, it has become more important to address information security and risk management on a board level to ensure buy-in from the Boards of Directors.

During this presentation ISACA NL board member [Arash Rahmani](#) will focus on aligning the security strategy with the organizational strategy and getting board

Webinar ISACA NL & ISC2, 21 november 2023

## NIS2, Zin en Onzin

Op dinsdag 21 november 2023 organiseren ISACA NL Chapter en ISC2 NL de bijeenkomst 'NIS2, Zin en Onzin'.

- [Rob Augustinus](#) zal vanuit zijn directe betrokkenheid bij het tot stand komen van wet- en regelgeving zijn licht laten schijnen op het onderwerp;
- [Fokke Jan van der Tol](#) zal het onderwerp vanuit zijn juridische achtergrond belichten en verbindingen leggen naar andere, aanverwante Europese wetgeving;
- [Daan Brinkhuis](#) zal vanuit zijn verantwoordelijkheid bij het Z-CERT het tot stand komen van de CSIRTs belichten.

Let op! De bijeenkomst vindt plaats in De Observant te Amersfoort. Er is plek voor 58 deelnemers en vol = vol!

Daarom is [aanmelden voor deelname](#) verplicht.

## Risk Event news

### Five questions for Risk Event speaker Marc van Meel on the ethical implications of artificial intelligence

The quick rise of AI has created many opportunities. But the fast changes also create ethical concerns. At our Risk Event 2023 Marc van Meel, Managing Consultant at KPMG and AI Ethicist, will delve into the ethical and political implications of technology on our society.

## An Exploration of AI Risk & Collaborative Assessment Methodology

Yuri Bobbert & Vincent van Dijk - The year 2022 marked a significant milestone in Artificial Intelligence (AI). ChatGPT released an AI hurricane on the world, accelerating the AI arms race between technology giants like Microsoft and Google. Next to the enormous potential AI can bring, people, governments, and companies are increasingly concerned

regarding the potential (mis)use of AI which may harm persons' civil liberties, rights, and physical or psychological safety. Please note that this article features in ISACA NL's recent Journal.

## Five questions for Risk Event speaker Mona de Boer on Trustworthy AI and accountability

Mona de Boer, partner Data & Technology at PwC, will be a speaker at our Risk Event 2023. Beforehand we asked her some questions, for example what are some of the most significant risks Mona has identified, when it comes to the adoption and implementation of artificial intelligence in various industries?
