

ISACA NL Chapter maart / March 2024

Firas met enkele leden van de Risk Event Commissie '24 tijdens de evaluatie in februari.

Beste ISACA-community,

Het jaar is pas twee maanden (en een paar dagen) oud, maar wij zijn nu al bezig met het organiseren van het Risk Event 2024. In januari hebben wij het Risk Event van 2023 geëvalueerd en we nemen de lessons learned mee voor dit jaar.

In februari hebben wij gekeken naar een mogelijke datum, venue en thema. Om een tipje van de sluier te lichten; het event zal helaas niet op 16-11 plaats vinden zoals jullie inmiddels gewend waren van ons. Ook wel logisch, aangezien de 16^e van november dit jaar op een zaterdag valt, maar niet getreurd; er zit wel een 6 in de datum 😊.

Voor wat betreft het thema voor dit jaar; deze houden wij nog even on the down low. Wij zijn nog wel op zoek naar interessante sprekers voor het risk event.

Mocht je nou zelf graag een keer op het podium willen staan voor de ISACA-community of ken je een interessante spreker die wij zouden moeten uitnodigen,

neem dan contact op met de [Risk Event Commissie](#).

Wij hopen jullie dit jaar wederom weer te mogen verwelkomen!

Hartelijke groet ook namens de Risk Event'24 Commissie,

Firas Abali

Voorzitter Risk Event '24

Bestuurslid ISACA NL Chapter

Square Table March 6, 2024

5 common mistakes to avoid when preparing for the Digital Operational Resilience Act (DORA)

DORA will apply as of 17 January 2025. How do you prepare for DORA and which mistakes do you need to avoid?

Register now for our webinar on the 6th of March with ISACA NL Board member [Arash Rahmani](#) and find out.

Arash Rahmani helps bridge the gap between the board and the Chief Information Security Officer (CISO). With a wealth of international experience in information security and strategic leadership, Arash serves as a trusted advisor to boards and also steps in as an interim CISO when required.

Round Table Eindhoven March 13, 2024

How does IAM NIS2 compliancy help?

NIS2 is very hot. Logically, many more organizations will have to deal with it. A while ago [André Koot](#) wrote a [blog](#) about NIS2 and IAM. The conclusion is that the guideline does not say much about IAM.

So that's what we're doing: IAM is a prerequisite for the implementation of NIS2. And in this knowledge session, we will tailor that even more to what that means for you.

Location: Van der Valk Eindhoven

Time: 18:00 - 20:00

The effectiveness of Cyber Security Regulatory Compliance – EU regulations

In this webinar [Yoshihiro Kawasaki](#) will inform you on his academic research and the web survey going through basic IT audit controls (ITGC), Security Frameworks (ISO27001 & NIST800-30), and Incident Management Obligations from the US & EU regulation (NIS2, GDPR, CSA, & DORA).

Square Table March 27, 2024

Risk management in a business language

Business leaders speak a business language. Senior management doesn't communicate in cybersecurity models, instead they use business models. In this webinar [Vincent van Dijk](#) and [Gilbert van Zeijl](#) will show you how you can use a popular business model, the Business Model Canvas, to set up risk management practices. They will discuss how you can use the Business Model Canvas (BMC) and turn it into a Risk Model Canvas (RMC) to drive risk-based security programs using the language of business.

Round Table Zwolle April 17, 2024

Access Governance and Compliance in Zero Trust environments

Access control is a core functionality in information security and cybersecurity. The information landscape is evolving fast, the move to cloud and API access is evident.

Identity and access management (IAM) needs new paradigms and one of these is dynamic access control. In this presentation [André Koot](#) will show the development and as a sidenote will explain the effect of the paradigm shift for IT audit.

Location: Van der Valk Zwolle

Time: 18:00 - 20:00

Square Table April 24, 2024

Cybersecurity As a Strategic Opportunity

During this seminar, [Dave Chatterjee](#) will shed light on what it takes to develop, leverage, and sustain cybersecurity as a strategic capability. More specifically, he will draw upon the empirically derived Commitment-Preparedness-Discipline (CPD) framework and insights gained from podcast interviews and consulting experiences to review several success factors and best practices.
